

**Pesticide Notification
2019-2020 School Year**

The Watertown-Mayer School District utilizes a licensed, professional pest control service firm for the prevention and control of rodents, insects and other pests in and around the building. Their program consists of the following:

1. Inspection and monitoring to determine whether pests are present, and whether any treatment is needed;
2. Recommendations for maintenance and sanitation to help eliminate pests without the need for pest control materials;
3. Utilization of non-chemical measures such as traps, caulking and screening; and
4. Application of EPA-registered pest control materials when needed. (This means pest control materials are not necessarily applied on every service visit.)

Pests can sting, bite, cause contamination, damage property, and spread disease. Therefore, we must prevent and control them. The long-term health effects on children from the application of such pest control materials, or the class of materials to which they belong, may not be fully understood. All pest control materials are chosen and applied according to label directions per Federal law.

A list of estimated service visits for each school year can be obtained by contacting the district office or the main office at each building site.

Questions related to the application of pesticides should be directed to Bob Dressel, the Buildings and Grounds Supervisor at 952-955-0417.

**Parent/Guardian/Employee Request for Pesticide Notification
Watertown-Mayer Public Schools**

Complete and mail this form only if you are requesting to be notified of a pesticide application.

Please read completely and print clearly.

I understand that the school will make available an estimated schedule of pesticide applications for review and copying at the school office. I understand that the school may ask me for reimbursement for the costs of notification.
