

# MINI Clinic

Minnesota Immunization Networking Initiative

# Free Flu Shots!

## What is Influenza (Flu)?

- The flu is a contagious respiratory illness caused by a virus. **It can make you really sick.**

## Why is the flu vaccine important?

It is **THE BEST** way to prevent getting the flu!

## Who should get the flu shot?

- People 6 months of age and older.
- Flu shots are safe and recommended for pregnant women and people with chronic conditions.

## Who should not get the flu shot?

- Children younger than 6 months old and people who have had an allergic reaction to the flu shot.

## Can a flu shot give you the flu?

- Absolutely not! You cannot get the flu from a flu shot.

## Do I really need a flu vaccine every year?

- **Yes!** The CDC recommends a flu shot every year to protect you and your community from influenza!
